Join us for a Webinar on Technical Assistance, Resources and Materials Available through NIWAP to Support Your Work with Immigrant Survivors

Immigrant survivors often face unique barriers in navigating various systems and accessing victim services. These barriers are varied and can include lack of understanding of culture, language access, immigration status, and victim focused legal representation. This webinar will provide an overview the full range of protections immigrant survivors of domestic and sexual violence are legally eligible to access and the technical assistance (TA), materials and resources available through the National Immigrant Women's Advocacy Project (NIWAP) and other TA providers to support victim advocates mitigate barriers to create inclusive, victim-focused approach.
