

## Reduced cost telephone service for the families of inmates and detainees

Our service provides each person called with telephone number(s) local to the facility they're loved one is detained in. Since the cost of calling from prisons and detention centers is usually distance based, we dramatically reduce the costs by carrying the call over **our long distance** network. When dialing their friends and family with LocalCall™ access numbers, detainees (through their commissary or card account or the family member through their pre-paid account) pay the detention facility the lowest possible **local** call rate thus saving the cost of calling long distance. For example detainees in NJ county jails dialing LocalCall™ access numbers pay \$0.03/mn rather than \$0.75/mn for US domestic calls and/or \$2.00/mn for international calls.

Our high quality long distance network picks up the detainee's call from the assigned local access number and connects it to our VoIP network. The combination cost of the local call and our service fees will result in dramatic savings.

There are never any setup or termination fees of any kind. Service is month-to-month. There are no contracts to sign.
